

HTML: manage images EXIF orientation TAG

To remove any EXIF tag that forces image to rotate, you can strip images with:

```
exiftool -Orientation= -thumbnailimage= -ifd1:all= -overwrite_original *.jpg
```

And also you can use a css property file with:

```
img {  
  border: none;  
  image-orientation: none;  
}
```
