

HTML: how to output variables

```
<script>
  function printVar() {
    const origin = window.location.origin;
    document.write(`${origin}`);
  }
  printVar();
</script>
```

- | | |
|---------------------------------|---------------------------------------|
| 1. Get the full URL: | <code>window.location</code> |
| 2. Get the only protocol: | <code>window.location.protocol</code> |
| 3. Get the host (without port): | <code>window.location.hostname</code> |
| 4. Get the host + port: | <code>window.location.host</code> |
| 5. Get the host and protocol: | <code>window.location.origin</code> |
