set t_te=
set ts=40
set paste
set number

set fileencodings=ucs-bom,utf-8,latin1
filetype plugin indent on
syntax on

set laststatus=2
set statusline=
set statusline+=%<\                     " cut at start
set statusline+=[%n%H%M%R%W]\           " flags and buf no
set statusline+=%y\                     " file type
set statusline+=%-20t\                  " path
set statusline+=%=[%l,%c]\              " line, column
set statusline+=%P                      " page
```

```
colorscheme darkblue
set guifont=Hermit:h16
```

To change the font name/size:

- Start a graphical vim session.
- Do :e $MYGVIMRC Enter.
- Use the graphical font selection dialog to select a font.
- Type :set guifont= Tab Enter .
- Copy the line and paste in the config.
- Save and Exit

Adding a shell entry: **Edit with vim**

```
Windows Registry Editor Version 5.00

[HKEY_CLASSES_ROOT\*\Shell\Vim]
@="Edit with &Vim"
"Icon"="\"C:\\MyProgs\\text\\vim82\\gvim.exe\""

[HKEY_CLASSES_ROOT\*\Shell\Vim\command]
@="\"C:\\MyProgs\\text\\vim82\\gvim.exe\" \"%1\""
```

```
Note that:
.gvimrc is read by gvim
.vimrc is read by vim
```
