

Windows: disable rdp for specific user

Start -> Run -> Gpedit.msc

The screenshot shows the Local Group Policy Editor window. The left-hand tree view is expanded to 'User Configuration' > 'Windows Settings' > 'Deny log on through Remote Desktop Services'. Red circles with numbers 1 through 7 highlight the following steps: 1. Computer Configuration, 2. Windows Settings, 3. Security Settings, 4. Local Policies, 5. User Rights Assignment, 6. Deny log on through Remote Desktop Services, and 7. The 'Add User or Group...' button in the dialog box. The dialog box shows the user 'WIN-709VGMTCBNT\Administrator' added to the list.

```
gpupdate /force /target:computer
```
